SESSION 5 · THE FLOW · MINUTES FROM THE START

REPO: WORK THE PAGE · PRESENTATIONS · POLL / CHAT · BLACK NUMBER: NEVER SKIP · RED: STOP BY

0 — (1) §00 BRIDGE

BRIDGE: three Session 4 recall items, all b by content. Three minutes.

Personal plan: your click is the contract; chats may train unless you switch it off, up to five years on and 30 days off, state no default [M]. Her job and her town together. The full answer: model, date, what you decided.

3 — (2) §00 FRAME

OBJECTIVE. Say it once: explain it, break it, improve it, say what stays yours.

Non-advisors: "the workflow you were handed is still someone's recurring task." **Advance the model** ×3: the box changes, the ring of five does not. Click **5 Hand it over**. Point at the Part 2 card: 8 + 2 + 3.

5 — (3) §01 CASE 5

POLL 1 Which step breaks first? Silent commit, key the Room tally, reveal.

Step 2 breaks first and loudly: the skill names a model that retires [H]. Steps 3 and 4 break second, quietly. **One link out:** Case 5 section 3, the log's second row (nested bullets in 7 of 8; 1 of 8 pass all five checks). Bridge: the date was public weeks ahead.

15 — (4) §02

Pin A, jump to 30 Sep, then 30 Nov: retired, requests fail [H]. Pin C: untested. POLL 2 then gate B + rule 2, Advance the model ×4.

Stamps: STOPPED, RUNS, RUNS, STOPPED + HELD 4 OF 5. Land: "a gate names what may run; a scorecard names what right looks like; approve once per release." Last 30 seconds: what to listen for PAGE 2, L

20 — (5) BLOCK 1

PRESENTATIONS 1 to 4. A slot is 13: talk 8, builder 2, questions 3. PAGE 2, P

Call "one minute" at 7:00; stop the talk at 9:00. Name Appendix E4 once before the first. CUE to each builder. **Block 1 done by 72.**

72 — (6) BREAK

BREAK. Post "back at" a clock time in chat.

Give the time in their zone, not yours. **Break starts by 72** or block 2 runs into the discussion.

87 — (7) BLOCK 2

PRESENTATIONS 5 to 8. Same slots. PAGE 2, P

A presenter who could not run it presents where it stopped: valid, and the finding is about the package. **Block 2 done by 139.**

139 — (8) §03

POLL 3 how much faster? Lock the room's band, Reveal the four trials: +40, +25.1, +14, minus 19. Click METR.

"They believed plus 20; they were minus 19." Predict the Paper: b, b; yourself plus 0.26, the tool minus 0.69. Time One Task: saves 45 a time, 6 hours a month; drag checking up. Land: "felt faster is not faster; time it."

144 — (9) §04

Eight moments, the room calls 1 or 2: tool 1, 4, 6, 8; you 2, 3, 5, 7. POLL 4 short answer, then RANK THE REASONS, Lock my order, Show the survey's order.

32% advice, 21% relationship, 17% cost, 11% returns, 10% alone, 9% communication [M]. Land: "the judgments are the fee."

149 — (10) §05

THE DISCUSSION. Vote a, b, c or d in chat; write the tally down. 2 · Weigh both cases → 3 · The complication → 4 · Vote again. PAGE 2, D

Minority first, 90 seconds each. Complication on screen with 32% + 21% = 53% beside it. Show both tallies; say nothing about the delta. Six or more of 8 on one side: the middle argues the other.

164 — (11) CLOSING

CLOSING CHECK, written. CHAT one line each: explain, break, improve, keep.

Read three aloud. A line with no "stays yours": name section 04. Three minutes, from the reserve; never cut.

167 — (12) ZOOM

CLOSE. Improved versions and packages back to each builder; where the course materials live.

One sentence: the tools change and the judgment does not. Ends at 169; 11 minutes of buffer.

SESSION 5 · PAGE 2 · SETUP, THE PRESENTATIONS, THE CASE, THE DISCUSSION, THE ANSWERS

PRESENTATIONS · LISTEN-FOR CARD · RUN FLOW · CUE

SETUP

- **Tab 1** Session 5, Core only
- **Tab 2** `cases/case-5.html`
- **Tab 3** the pairing list from Session 4; each presenter's `changes.txt`
- Four polls built from `session-5-polls.md`; nobody a co-host
- Three chat lines ready: the break time, the closing check, the one-thing line
- Speaker labels on; a visible clock for the 8:00 and 9:00 marks

NOT TONIGHT

- Live demonstrations of any workflow
- Appendix E1 (their rehearsal, before class)
- Vendor names for note-takers or CRMs
- Any date, weight or platform not on the verified card
- Anything with a real client in it

CHECKPOINTS

- **20** presenter 1 on
- **72** block 1 done, break
- **139** block 2 done
- **164** closing check, whatever is unfinished

DROP ORDER IF LATE

- 1 §03 Time One Task (saves 1)
- 2 §04 rank to lock-and-show (saves 1)
- 3 §00 frame to the objective line (saves 2)
- 4 discussion defence 7 to 5 (saves 2)
- **Never drop:** the case commit, the presentations, the two votes, the closing check

ANSWERS

- Bridge: all b · poll 1: step 2 · poll 2: B and E · poll 3: the 10 to 20% band (mean of the four bars 15.0; the spread is the lesson)
- §03 paper: b, b · §04: tool 1 4 6 8, you 2 3 5 7; rank 32 21 17 11 10 9 · §05: no right answer

P · MIN 20 AND 87 · 13 MINUTES A SLOT — The presentations: eight, in two blocks of four

1. **Order.** The pairing list from Session 4: nobody presents their own package and no two present each other's. The order in a block is yours. Slot starts: block 1 at 20, 33, 46, 59; block 2 at 87, 100, 113, 126.
2. **Talk 8, builder 2, questions 3.** The talk answers five questions: what it does and the problem; the design choices (tool, tier, prompt structure, verification); where it worked and the input that broke it; what they changed and the re-run result; one thing they take. "One minute" at 7:00; stop at 9:00. Open `changes.txt` before each slot.
3. **The builder's two minutes** (E4's order): understood first, missed second, what the package never said last.
4. **Your questions**, at least one to the builder: "Which input would you add to the test set?" · "Which model and tier is in the record?" · "What did the re-run show, and on which input?" · "What stays yours?" · to the builder: "What did the runner try that you did not anticipate?"
5. **Could not run it:** present exactly where it stopped. Valid; the finding is about the package. **No live demonstrations:** "the talk is the evidence; the transcript is with me."

L · MIN 19 · 30 SECONDS — What to listen for in the next hour

- **Four things per talk**, the four the page just taught: what it is made of, the input that broke it, the change and its proof, what stays human.
- **Listen for the tier.** A model the presenter names that the package never stated is a package gap, said at the builder's turn.

G · CUES — Three questions and the closing line

- CUE §01 reveal: to a step 3 or 4 voter, "what would you see on the day?"
- CUE each builder: "what did the presenter understand that you did not write down?"
- CUE §03: "which confidence predicted more critical thinking?" Yourself.
- **Closing check, written:** explain, break, improve, keep. Read three aloud.

C · MIN 5 · §01 AND THE ONE LINK — The One-Pager That Has to Survive a Model Change

- **Five steps:** paste the figures; run the prompt on the model the skill names; draft the one-pager; check it; save it. Silent commit, POLL 1, tally, reveal.
- **Link out once** after the reveal: "Open Case 5", section 3, Document 5B's second row. Same prompt, eight drafts: nested bullets in 7 of 8 on the new id, none of 8 on the old; figures clean in 8 of 8; 1 of 8 pass all five checks. "The swap changed the layout, not a number."

F · MIN 15 · §02 RUN FLOW — Click every pin, then drag

- **A**, today: deprecated since 30 Sep, retirement 30 Nov, replacement named; past 30 Nov: retired. **B**: active, not sooner than 28 Sep 2027 (Sonnet 5.5); "write the date you tested it". **C**: runs on whatever is current, untested.
- Gate **B** + rule **2**, Advance ×4: STOPPED (names Sonnet 5.5), RUNS, RUNS, STOPPED + HELD 4 OF 5. **A** + **1** if asked: RUNS, FAILS, FAILS, FAILS.
- The page replays October 2026: say so once, and do not read "days to go" as today's.

D · MIN 149 · §05 — The discussion: the proposition and the prediction

- As the tool does more of the analysis, an adviser's value moves to the relationship. Predicted, N about 8: vote 1 a 2, b 4, c 2, d 0; vote 2 a 1, b 3, c 3, d 1. A prediction, not data.
- **Complication, on screen:** "Quality of advice" is what the client perceived, and perceived quality includes how the advice was explained and whether it was theirs; the two pans may be one pan [M]. Beside it: 32% advice quality, 21% relationship, 53% together.

H · FOR YOU — Verify before teaching

- Open Anthropic's deprecations page and models overview once [H]. Case 5's log rows on the old model id are a dated record and cannot be re-run.
- The four trials, Morningstar, Vanguard and the CFP exam weight are M and listed in the run sheet's verify section. Lee et al. was opened in full [H].
